‘We’ll Meet Again’
The Home Front

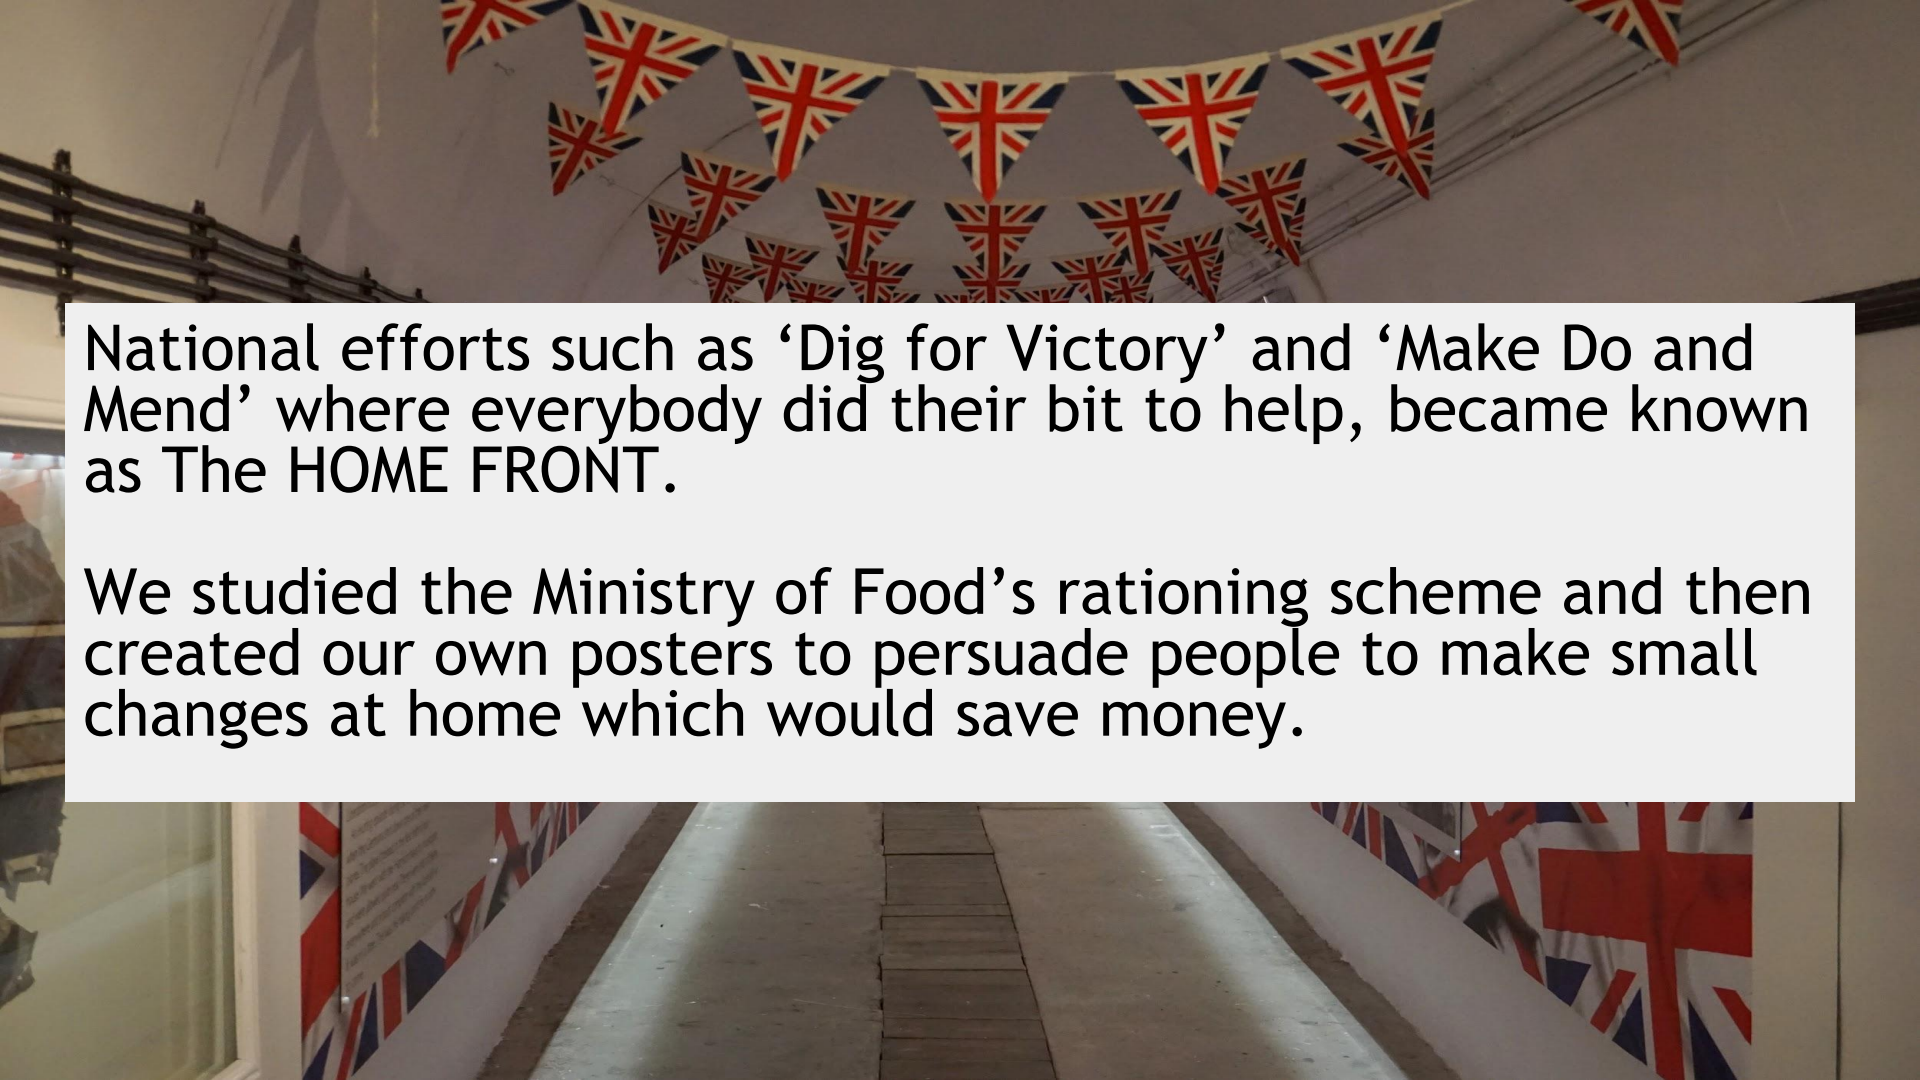

We studied examples of posters that the Ministry of Information produced during WW2.

They were designed to persuade people to be frugal in those times of harsh rationing.

Famous slogans such as **‘Dig for Victory’** and **‘Make Do and Mend’** featured on many posters.

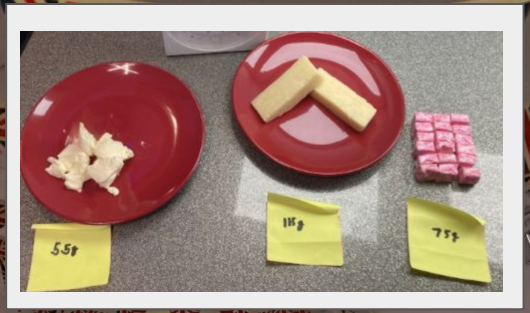

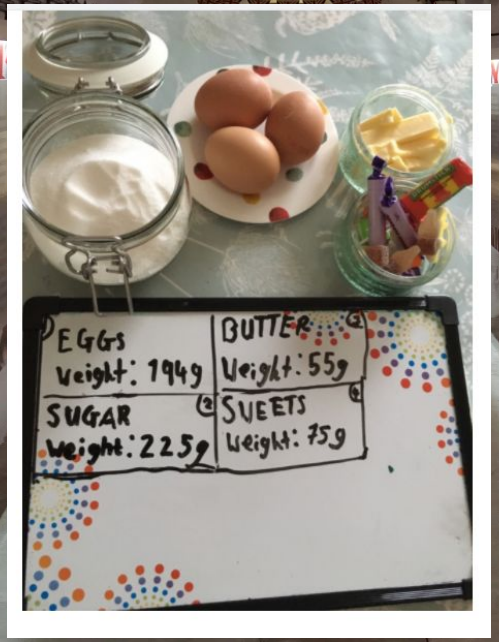

National efforts such as ‘Dig for Victory’ and ‘Make Do and Mend’ where everybody did their bit to help, became known as The HOME FRONT.

We studied the Ministry of Food’s rationing scheme and then created our own posters to persuade people to make small changes at home which would save money.

Give scraps to Pets

Thinking critically & reflecting on evidence

Although many foods were not actually rationed, they were in very short supply or even not available.
Some children grew up never seeing bananas or oranges for example, as these were imported from overseas.

What foods or other goods do you think were in short supply? Why?

Meat, Choclate, Margarine, Fruits And Vegetable. They were imported items. The Germans were sinking the merchant ships bringing these items.

Although many foods were not actually rationed, they were in very short supply or even not available.
Some children grew up never seeing bananas or oranges for example, as these were imported from overseas.

What foods or other goods do you think were in short supply? Why?

In the video we watched, Tomatoes were in short supply. i think this is because they are very hard to grew in the winter without sunshine.
