

We use White Rose Maths at Christ the King as our main scheme for teaching and learning Maths.

White Rose have an extensive range of online resources that support home learning. There is a useful advice and guidance section for parents that will explain the schemes of learning and how the 'Blocks of learning' are organised.

<https://whiteroseeducation.com/parent-pupil-resources/maths>

There are free home learning videos for every small step in each year group.

Online learning

Our fantastic teachers have produced home learning videos for every single small step. So if your child needs to work at home or catch up, these videos are fun, practical and super-easy to use!

For each learning block, we produce a set of questions for your child to solve. You can download and print these questions by purchasing a subscription or a printed workbook format from our online shop.

Each workbook covers one block of learning, so the size of the workbook depends on the length of the block.

Both the subscription and the workbooks are available at a very low cost.

You can also download free workbooks that support each block of learning.

Get the free workbooks

Follow the web address and click on the parents & pupils tab.
