

Easter Holiday Maths Revision.

Spend time over the Easter holiday consolidating the maths you have covered so far this year.

Look back over the maths home work that has been set each week by your teachers. Correct any mistakes that you made. Talk about how you worked out your answers with an adult.

Learn your times tables really well and the fact family that it belongs to, including the inverse division.

e.g. $2 \times 5 = 10$ $5 \times 2 = 10$ $10 \div 2 = 5$ $10 \div 5 = 2$

This year, the **National Numeracy Procedural test will be online**, not a paper booklet. Try to do Maths Blast on your Hwb page each day. Try to increase your speed and confidence answering the questions. This will really help with reading questions and answering them on a computer or tablet. Mrs Watts and Mr Mussa will look at the weekly scores for each class and choose one person who has made the biggest improvement to receive a prize.

Print out some of the Big Maths Beat That tests that are on our 'Children's Page' on the school website. Try to beat your best score in a timed test.

Log into your Active Learn account, go into your library and revisit any of the activities that have been set during this year by your teacher. Look at some of the Speaking and Listening or Problem Solving activities allocated to you and discuss the way you would solve them with a grown up.

If you would like to do some extra test practice you can access sample test material on the Learning Wales site. Remember only the Maths Reasoning paper is a written paper. The Link is on our school website and below.

<http://learning.gov.wales/resources/browse-all/numeracy-sample-materials/?lang=en>

Or try some problem solving activities from the NRICH website such as this:

<https://nrich.maths.org/2002>

Adults at home can help you select the age appropriate activities.
