I hope I land on square **15**
as it has the longest ladder.

15 is good but the ladder
on **3** is better!

Why does Matt say the ladder on square 3 is better?

I played the game.

It took me **3** throws of the dice to win.

Show how you can win with 3 throws of the dice.

There are two boards in case you need to start again.

What numbers were thrown?
