

What number?

Write the missing digits to make each sentence correct.

- 1 $3045 > 3 \square \square 5$ 3 $6969 < 6 \square \square 9$ Accept any suitable answers.
 2 $8020 > 8 \square \square 9$ 4 $5002 > 5 \square \square 1$
 5 Write the number on each flag.

Addition grid

- 6 Complete the addition grid.

+	3459	7071	1009	6880
2000	5459	9071	3009	8880
200	3659	7271	1209	7080
20	3479	7091	1029	6900

Choose three numbers. Write the total.

Do this four times.

74	36	18	55	42
----	----	----	----	----

- 7 $\square + \square + \square$ 9 $\square + \square + \square$

Any four of the following:

$$74 + 36 + 18 = 128$$

$$74 + 36 + 42 = 152$$

8 $74 + 18 + 42 = 134$

$$36 + 18 + 55 = 109$$

$$36 + 55 + 42 = 133$$

Some children may need to use jottings to find the totals.

9

$$74 + 36 + 55 = 165$$

$$74 + 18 + 55 = 147$$

10

$$74 + 55 + 42 = 171$$

$$36 + 18 + 42 = 96$$

$$18 + 55 + 42 = 115$$

Mystery numbers

How can the digits in the total help you work it out?

11 Find the missing numbers.

- Each box holds a 2-digit number.
- The first number is 10 more than the second.
- The second number is 10 more than the third.

$$\boxed{39} + \boxed{29} + \boxed{19} = 87$$
